

Data Analyst

Description

We are working closely alongside a Local Authority in Newry to assist with the appointment of a **Data Analyst**, on a **3-month contract**, highly likely to be extended at clients discretion. Please apply with your CV for immediate consideration.

Rate of Pay: £19 – £24 per Hour

Summary

The Data Analyst post is based within the Chief Executive Directorate, Community Planning & Performance department and will work at a corporate level to provide a data analytics service. The postholder is required to collect data on a range of topics, including government policy and strategy. The data is to be analysed, interpreted and reported on and where appropriate recommendations made to Council.

Responsibilities:

- Collect data from various sources on government policy, strategy, and other relevant community topics.
- Clean, organize, and prepare data for analysis using appropriate tools and techniques.
- Conduct statistical analysis and identify trends, patterns, and relationships within the data.
- Generate clear and concise reports with visualizations (charts, graphs) to effectively communicate insights.
- Translate complex data findings into actionable recommendations for Council decision-making.
- Stay up-to-date on data analysis best practices and relevant government data sources.
- May assist with developing and maintaining data collection processes.

Requirements:

- **Minimum Qualification:**
 - A Level 6 qualification (e.g., University Degree) in a relevant subject area such as mathematics, finance, economics, or a social science.
- **OR** In lieu of a formal qualification:
 - At least 3 years' demonstrably relevant experience in:
 - Undertaking research and interpreting data.
 - Clearly presenting analysis and results verbally and in writing.
 - Using analytical tools like Microsoft Excel and Power BI.
 - Creating reports for management with effective recommendations based on data analysis.
- **Essential Skills:**
 - Proven experience (minimum 2 years, or 3 years for non-graduates) in data collection, cleaning, and analysis.
 - Strong analytical and problem-solving skills.
 - Excellent written and verbal communication skills, with the ability to
