Job Description

We are looking for a talented Data Analyst with a passion for sustainability to join our team. The ideal candidate will have a strong background in data analysis, with a focus on Carbon metrics and data. They will be responsible for collecting, analyzing, and interpreting Carbon data from various internal and external sources to provide actionable and reliable insights and supply chain data to EcoVadis customers to drive effective decision-making. It will feed EcoVadis' products and services, ensuring the highest data quality and trust in the carbon data network.

The Carbon Data Analyst key responsibilities include:

- Support development and implementation of data validation methodology, using data-driven insights to drive progress and accountability
- Data collection and organization: Collect, integrate, and organize carbon data from various sources, including company reports, databases, and third-party providers, as well as organizing carbon data from our internal (Metrics) database.
- Proxy Data Modeling: Create and maintain methodology to model carbon data proxies for sectors where data might be incomplete, as well as creating models for estimating robustness of targets and target achievement. These models may incorporate factors such as industry type, geographical location, company size, and other relevant variables. Document methodologies, assumptions and sources used for proxy modeling. Proficiency with AI-based tools is an asset.
- Data Analysis: Analyze carbon performance metrics, such as carbon emissions, energy usage and target progress etc., to identify trends, patterns, and areas for data quality improvement to increase the accuracy of validation results.
- Database Management: Develop and maintain databases and data management systems to effectively store and manage carbon data and corresponding requests.

Our hiring team looks forward to reviewing your CV, in English, with a guaranteed response to every application. A new job with purpose awaits you!

Don't fit all the criteria but still think you'd be a good candidate? Please apply anyway to give our hiring team the opportunity to assess your skills and to learn more about what you could bring to EcoVadis. We're interested in hiring from

a diverse and skilled talent pool, regardless of professional and educational background.

Can the hiring process be adjusted to suit my needs? Yes. We want everyone going through the hiring process with EcoVadis to feel confident that you are able to demonstrate your full potential. We welcome applications from disabled people, people with long-term health conditions, and neurodiverse candidates. If you need any adjustments, including the provision of interview questions, please let the hiring team know.

Our team's strength comes from everyone's uniqueness and is founded upon mutual respect. EcoVadis commits to equity, inclusion and reducing bias in our hiring processes. EcoVadis does not accept any form of discrimination based on color, national or ethnic origin, ancestry, citizenship, religion, beliefs, age, sex, gender identity, sexual orientation, neurodiversity, disability, parental status, or any other protected characteristic that makes you unique. In your application, we encourage you to remove personal information such as: photographs, marital status, number of children, religion, gender, residential postal code, university graduation date, past medical or parental leave(s) taken, nationality (instead, please state if you are legally eligible to work in the job region/country), university name (instead, please state any degrees obtained and the study major).

How the process will look like

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you're part of making data play an even more important (and understood) part withing Brand New Day.
