

Junior Data Analyst – Catalog ML & Analytics (e-Xperience Associate)

Description

Job Description

Embark on a dynamic journey with Allegro's Internship Program, e-Xperience 2024, spanning from September 1st, 2024, to February 28th, 2025. Upon successful completion, we aim to extend a permanent contract, fostering your professional growth and development.

Are you ready to kickstart your career? Apply now and seize the chance to shape the future of e-commerce!

What does this role involve

- You will analyze large data sets (using SQL and/or Python)
- You will support preparing analyses and dashboards supporting work on the wide range of products and assortment on Allegro.
- You will develop tools, algorithms, and models for monitoring Allegro's selection and pricing analytics
- You will provide business recommendations based on data, influencing team work.
- You will be responsible for improving both the shopping experience for Allegro's customers and the results of our sellers, thanks to the results of your analyses

We are looking for people who:

- **Know SQL well and the basics of statistics**
- Can think analytically (define the sources of the problem, notice deficiencies and errors in data, look for their source)
- Like to share the results of their work in a way that is understandable to the recipients
- They want to connect the dots to see if they form a larger whole
- **Know English at B2+ level**

What we offer

- A hybrid work model that you will agree on with your leader and the team. We have well-located offices (with fully equipped kitchens and bicycle parking facilities) and excellent working tools (height-adjustable desks, interactive conference rooms)
- A wide selection of fringe benefits in a cafeteria plan – you choose what you like (e.g. medical, sports or lunch packages, insurance, purchase vouchers)
- English classes that we pay for related to the specific nature of your job
- The necessary tools for work
- Working in a team you can always count on — we have on board top-class specialists and experts to learn from
- Hackathons and an internal educational platform, MindUp (including training courses on work organization, means of communications, motivation to work and various technologies and subject-matter issues)

May 16, 2024

Why is it worth working with us

- We explore vast data about user behavior to understand their needs and pain points
- We test and analyze the implemented changes
- We improve the platform and adapt it to the needs of customers
- We work with members of interdisciplinary teams (UX, Product Managers, Developers)
- We use the latest tools (GCP, Python, [PySpark](#), Data Studio, Tableau)
- Our analyzes have a real impact on the appearance and operation of the website
