

Big Data Java Solutions Architect (Inside IR35 Contract)

Description

Company Description

Version 1 has celebrated over 26 years in the Technology industry and continues to be trusted by global brands to deliver IT solutions that drive customer success. Version 1 has several strategic technology partners including Microsoft, AWS, Oracle, Red Hat, OutSystems and Snowflake. We're also an award-winning employer reflecting how employees are at the heart of Version 1.

We've been awarded: Innovation Partner of the Year Winner 2023 Oracle EMEA Partner Awards, Global Microsoft Modernising Applications Partner of the Year Award 2023, AWS Collaboration Partner of the Year – EMEA 2023 and Best Workplaces for Women by Great Place To Work in UK and Ireland 2023.

As a consultancy and service provider, Version 1 is a digital-first environment and we do things differently. We're focused on our core values; using these we've seen significant growth across our practices and our Digital, Data and Cloud team is preparing for the next phase of expansion. This creates new opportunities for driven and skilled individuals to join one of the fastest-growing consultancies globally.

Job Description

Here at Version 1, we are currently looking for an experienced Big Data Java Solutions Architect to join our growing Digital, Data & Cloud Practice.

You will have the opportunity to work with the latest technology and worked on projects across a multiplicity of sectors and industries.

You will be:

- Leading the development of Java and Python projects.
- Designing and developing API integrations using Spark.
- Collaborating with clients and internal teams to understand business requirements and translate them into HLD and LLD solutions.
- Defining the architecture and technical design.
- Designing data flows and integrations using Hadoop.
- Working with the product team and testers to implement throughout testing.
- Creating and developing comprehensive documentation, including solution architecture, design, and user guides.
- Providing training and support to end-users and client teams.
- Staying up to date with the latest trends and best practices, and share knowledge with the team.

Qualifications

You will have expertise within the following:

- Java and Python development knowledge (**Essential**)
- Previous experience with Spark or Hadoop (**Essential**)

Additional Information

Location: This role can be delivered in a hybrid nature from one of these offices London, Edinburgh, Birmingham, Manchester, Newcastle, Dublin or Belfast.

At Version 1, we believe in providing our employees with a comprehensive benefits package that prioritises their well-being, professional growth, and financial stability.

One of our standout advantages is the ability to work with a hybrid schedule along with business travel, allowing our employees to strike a balance between work and life. We also offer a range of tech-related benefits, including an innovative Tech Scheme to help keep our team members up-to-date with the latest technology.

We prioritise the health and safety of our employees, providing private medical and life insurance coverage, as well as free eye tests and contributions towards glasses. Our team members can also stay ahead of the curve with incentivized certifications and accreditations, including AWS, Microsoft, Oracle, and Red Hat.

Our employee-designed Profit Share scheme divides a portion of our company's profits each quarter among employees. We are dedicated to helping our employees reach their full potential, offering Pathways Career Development Quarterly, a programme designed to support professional growth."

How the process will look like

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you're part of making data play an even more important (and understood) part withing Brand New Day.
