Lead .Net-Developer

Description

As a Lead .NET Developer you have a crucial role in devising and creating smart applications within the automotive industry. You work in multidisciplinary teams on both improving existing and building new applications. With access to complex data issues, you make a significant contribution to helping customers move forward through advanced data solutions.

Responsibilities

You work on developing applications that offer automotive players insight into complex data issues.

Qualifications

You have an HBO/WO diploma, at least 5 years of experience as a .NET C# developer in Agile Scrum teams, experience working in Architecture and Domain Driven Design. You also have knowledge of automated testing and an eye for writing simple, maintainable code and have the right soft skills to lead your team.
